# Arcus After Hours Access

The Arcus After Hours Access panel offers three authentication methods. Scan your library barcode either from your library card or mobile phone and either enter your PIN or have an access link emailed or texted to you.

There are three states available for access.

Library Open
The access panel is disabled and the door will function as normal.

After Hours Access
The library door will only open for approved library users with the after hours access times.

Library Closed
The door is locked and entry by users is disabled.

Arcus After Hours Access can also be configured to work with Arcus Flow. This offers accurate reporting on how many people are using after hour access and how many people have entered when the door is opened.

Technical Specifications

Features	Barcode Scanner compatible with mobile phone and printed barcodes
Monitor	10" touch display
