

# ARCUS LIBRARY SELF SERVICE AS A SERVICE

Arcus can be supplied as a SaaS solution, allowing libraries to use their own hardware with the Arcus cloud solution.

Arcus Self Service offers a simple process for patron item circulation but includes powerful features for users wanting to get the most out of Self Service.

Arcus Self Service has many advantages over more traditional solutions including the following:

**Patron Preferences:** Arcus will remember the preferences of your users. If they prefer an emailed receipt rather than a print receipt Arcus will remember.

**Feature Rich Offline:** Arcus remembers item details so when offline functionality mirrors closely online functionality.

**Previous Transactions:** Arcus can store previous receipts so a user can print or email their previous few receipts.

**Web Based customisations:** Being browser based it is easy to add extra functionality to Self Service including links to the catalogue, digital collections, surveys, and library and council websites.

**Modular Features:** Features can be quickly turned on or off including promotional banners, step by step instructions, AV Unlocking, EFTPOS integration, and Self Service returns.
