

# ARCUS RESERVATION LOCKER

The Arcus reservation locker is designed to allow patrons to collect items from the lockers.

Reservations or other items can be placed on shelves and the doors lock.

A patron scans their library card and locker locations that has items for them opens, allowing the user to collect the items.

The lockers are modular so multiple lockers can be connected together.

Browsing collections could also be added to the locker, allowing users to borrow items.

These units could be installed in community centres, shopping centres, and other locations. When installed along with one of our External Return chute cabinets it offers true 24 hour library functionality including return, borrow, and reservation collection.
