

# ARCUS SORT SHELF

The Arcus Return Shelves use an integrated guided lighting system that helps turn your borrowers into a sorter!

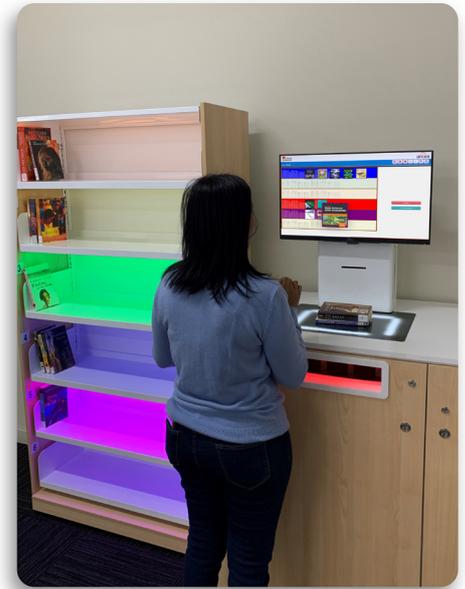

Items on the shelf are returned and ready to be borrowed so users can browse recently returned items and borrow them using the Sort Shelf. Exceptions like reservations and items belonging to other libraries are sent to the integrated Evo bin.

The return shelves can be configured for Self Service Returns with sorting and Self Service issues.

The patron places an item on the returns pad and the screen displays a return message and shows the designated return shelf or bin, the lighting for that location will light up to guide the user where to place the item.

## Main features:

- Customisable interface
- Guided light system
- Motorised self-leveling bin
- Emailed bin nearing full alerts
- Customised Library shelving

The Return shelves are modular with multiple shelves, kiosks, and return bin options available.

You decide what collections should be placed on what shelves and items on the shelves will be returned and sorted by your patrons. Exceptions (reservations, blocked returns, items for other libraries) will be placed in the return chute so staff can collect at your convenience.

## Technical Specifications

Dimensions	1800 (W) x 650 (D) x 1800 (H) mm	Indicators	Integrated LED indicator (customisable)
Weight	60 KG (without books in the bin)	Connectivity	Ethernet (TCP/IP) , optional: Wifi, 4G
Internal Bin Size	530 (W) x 590 (D) x 650(H) mm	External Finish	Smooth laminated surface
Supply Voltage	AC 100-240V, 300W max	RFID Antenna	Circular polarized, 4Dbi
